🔗 <https://akashrp.com/> | github.com/Akashrp512

Full-stack developer with **1.6 years of experience** in building **scalable, responsive web applications** using cutting-edge technologies like **React, Node.js, and AWS**. Proven ability to deliver impactful projects in **e-commerce, SaaS, and waste management domains**. Adept at backend development, API design, and database management, ensuring maintainable and optimized solutions.

EXPERIENCE

Thinkjs Pvt Ltd, Bangalore: Associate Software Engineer

JUNE 2023–Present

- **Designed and developed scalable backend systems** for the waste management platform, enabling multi-country operations and integrating diverse payment gateways like **PayPal** and **Chapa**.
- **Optimized performance** by integrating advanced features like **spatial proximity search** (Uber H3) and **real-time notifications** to enhance user and collector experience.
- **Integrated AWS services** such as **S3, SES, SNS, Lambda, EC2, RDS and DynamoDB** to support system storage, communication, and serverless processes.
- Collaborated with **cross-functional teams** (project managers, tech leads) to ensure smooth integration and seamless system delivery.

Way2agribusiness India Pvt Ltd, Bangalore: Full-stack Developer Intern

FEB 2023–JUNE 2023

- **Migrated a legacy PHP-based website** to a modern **Django and React (Next.js)** e-commerce platform for agricultural products by improving user experience.
- **Deployed and optimized websites** on **DigitalOcean**, ensuring high uptime, optimal performance, and scalability.
- Contributed to both **frontend and backend development** in an **agile environment**, helping drive features from ideation to production.
- Improved **SEO** and **web traffic** by developing SEO-friendly **Next.js** applications, leading to better visibility and user engagement.

PROJECTS

Waste Management App

Role: Backend Developer (*Node.js, PostgreSQL, AWS, Google APIs*)

Duration: 1+ year (Ongoing)

- Built the platform from scratch, enabling **seamless waste transactions** between users, collectors, and recycling companies.

- Implemented **spatial proximity search with Uber H3** and **Google Route Matrix API** for efficient collector allocation and shortest ETA.
- Developed **country-specific payment integration** (e.g., Chapa for Ethiopia, **PayPal**) with **wallet** features for fare management.
- Integrated **real-time notifications** to streamline communication between users, collectors, and recyclers.
- Designed **analytics dashboards and admin portal** for waste tracking, revenue insights, and operational management.

Wedding Planner Ecommerce Website

Role: Backend Developer (*Next.js, Zoho One, DynamoDB*)

- Developed backend services using Next.js and Zoho One for efficient inventory management and sales order processing.
- Integrated Razorpay Payment Gateway to ensure secure and smooth payment transactions.
- Utilized DynamoDB to store Zoho-generated tokens, ratings, and reviews, reducing API call limits.
- Managed product inventory, order completion, and optimized the platform for scalability and performance.

AI-based Interview SaaS Product

Role: Frontend Developer (*React, TypeScript, HTML, CSS*)

- Crafted **dynamic, user-friendly UIs** with React and TypeScript for seamless user interaction.
- Integrated **Web Speech API** for **voice recognition**, improving the interview process.
- Collaborated with **cross-functional teams** to customize features, enhancing product effectiveness.
- Designed a branding website using a Bootstrap template to effectively market the product.

SKILLS

Frontend:

- **Languages:** JavaScript (ES6+), TypeScript
- **Frameworks:** React, Next.js
- **Others:** Responsive Design, Dynamic UI Development

Backend:

- **Languages:** JavaScript (Node.js), Python
- **Frameworks:** Express.js, Django
- **Databases:** Postgres, DynamoDb, MongoDB
- **Cloud & AWS Services:** S3, SES, SNS, DynamoDB, Lambda, EC2
- **Others:** REST APIs, Payment Gateway Integration (PayPal, Razorpay), Basic System Design

EDUCATION

Bachelor of Engineering in Computer Science, Bangalore

Sri Venkateswara College of Engineering, Bangalore

2019 - 2023
