EXPERIENCE

Thinkjs Pvt Ltd, Bangalore: Associate Software Engineer

JUNE 2023–Present

- Developed backend for a waste management app using Node.js and Postgres, integrating PayPal for payment processing.
- Built a donation campaign website using Next.js, Tailwind CSS, and Redux (Rematch) for campaign management and donation processing.
- Developed backend services using NextJS and Zoho One for inventory management.

- Created an admin portal for MyCommute's ride-hailing app, implementing passenger management, driver onboarding, and data analytics.
- Worked closely with project managers and tech leads to gather requirements and develop backend systems.

Way2agribusiness India Pvt Ltd, Bangalore: *Full-stack Developer Intern*

FEB 2023–JUNE 2023

- Migrated a PHP-based website to a Django and React (Next.js) based e-commerce platform.
- Developed a MERN stack e-commerce application for agricultural products, enhancing digital sales.
- Deployed multiple websites on DigitalOcean, ensuring optimal uptime and performance.
- Worked in an agile environment, contributing to both frontend and backend development.
- Improved SEO and web traffic by developing Next.js applications.

PORTFOLIO

Project: Waste Management App (Youcan)

Role: Backend Developer (Nodejs)

Description:

- Developed backend services using Node.js and Postgres database.
- Integrated PayPal payment gateway for wallet features
- Implemented booking, notification systems for waste pickups and managed user and collector data.
- Enabled second-level sales for collectors to sell waste to recycling companies.
- Extended application for multi-country use with various payment gateways.
- Maintainable API documentation and technical docs to support frontend and product teams.

Project: Wedding Planner Ecommerce Website (www.meticulousbeaver.com)

Role: Backend Developer (NextJs, Zoho One,DynamoDB)

Description:

- Developed backend services using NextJS and Zoho One for inventory management.
- Implemented features for users to purchase wedding planner digital books.
- Managed product inventory, sales orders, and order completion with invoice generation.
- Integrated Razorpay Payment Gateway for secure and efficient payment processing.
- Utilized DynamoDB to store Zoho-generated tokens, ratings, and reviews to reduce Zoho API call limits.

Project: AI-based Interview SAAS product (talentberry.in)

Role: Frontend Developer (React, Typescript, Html,Css etc..)

Description:

- Developed an AI-based interview application using Web Speech API, React, and TypeScript.
- Integrated Web Speech API for an interactive recruitment experience.
- Used React and TypeScript to craft dynamic UIs for a seamless user experience.

-
- Collaborated with teams to tailor solutions, enhancing product success.
 - Designed a branding website with a Bootstrap template to market the product.

Project: Donation Campaign Website (rkctrust.com)

Role: Frontend Developer (NextJs, Tailwind Css)

Description:

- Developed a Next.js-based donation campaign website.
- Implemented features for clinic/hospital support donations.
- Created an admin portal for campaign management using Tailwind CSS and React.

Project: E-commerce Web Apps for Agriculture Marketing (way2agritech.com,way2smartfarmer.com)

Role: Full-Stack Developer (React, Nextjs, Django, Nodejs, Deployment)

Description:

- Built a MERN stack e-commerce app, contributing to both the frontend and backend.
- Developed a second SEO-friendly app using Next.js (frontend) and Django Rest Framework (backend).
- Implemented an integrated administration system for product management.
- Deployed both apps on DigitalOcean's Linux server for optimal user experience.
- Managed migration from legacy technology to modern solutions, boosting performance and maintainability.

Project: Ride-hailing platforms (MyCommute)

Role: Frontend Developer (React,Redux)

Description:

- Central in developing MyCommute's Admin Web App for a ride-sharing platform.
- Used React, Rematch, Styled Components, and Ant Design for a responsive frontend.
- Developed features like Passenger Management, Driver Onboarding, and Vendor Management.
- Designed an Analytics and Fare Management system for data insights.
- Assisted in creating a Roles and Permissions system for user access.

EDUCATION

Bachelor of Engineering in Computer Science, Bangalore

Sri Venkateshwara College of Engineering, Bangalore

2019 - 2023
