

Akash R P

Bangalore, Karnataka | +91-9740595079 | akashrp512@gmail.com | akashrp.com

Summary

Full Stack Developer with **2+ years** of experience building scalable, cloud based applications with a strong foundation in backend engineering and frontend architecture. Proficient in designing **RESTful APIs**, integrating **cloud services (AWS, DigitalOcean)**, and optimizing **backend performance with databases like PostgreSQL and DynamoDB**. Skilled in developing rich user interfaces with **React, TypeScript**, and TailwindCSS. Experienced across SaaS platforms in Waste Management, E-commerce, and EdTech, with a focus on performance, reliability, and seamless user experience. Passionate about leveraging modern tools, AI/ML APIs, and clean development practices to solve real-world problems.

Skills

- **Languages:** TypeScript, JavaScript, Python
- **Frameworks:** Node.js, Express.js, Next.js, React, Django, Selenium, Redux
- **Database:** PostgreSQL/MySQL, MongoDB, DynamoDB, Redis
- **Cloud services:** AWS (Lambda, S3, RDS, EC2, SES, SNS), DigitalOcean (Droplets, PAAS)
- **Tools:** Git, Postman,, Docker (basic), PM2, Nginx, PgAdmin
- **Soft Skills:** Teamwork, Problem-Solving, Adaptability, Time Management

Professional Experience

Thinkjs Private Limited, Bangalore

Associate Software Engineer

June 2023 -Present

Bangalore, Karnataka

Project : [*Youcan Waste Management*](#)

- Architected and maintained a **scalable backend** for a multi-country SaaS waste management platform.
- Built REST APIs using **TypeScript and Express**, enabling seamless client-server communication.
- Improved API performance using **Redis caching** and optimized SQL queries.
- Integrated payment gateways (**PayPal, Chapa**) with a **multi-currency wallet** system.
- Developed **spatial proximity search** using **Uber H3** and **Google Route Matrix API** for route planning.
- Integrated AWS services for scalable backend operations, including **serverless functions** via Lambda.
- **Tech Stack:** Node.js, TypeScript, Express, PostgreSQL, Redis, AWS (S3, Lambda, RDS, EC2, SES, SNS), Google APIs

Project : [*AI-Based Interview Platform \(TalentBerry\)*](#)

- Developed the **frontend of an AI-powered virtual interview platform** using **React, TypeScript, TailwindCSS**, and **Rematch** for state management.

- Initially integrated **Web Speech API** to handle **speech-to-text and text-to-speech interactions**, enabling the interview bot to conduct real-time conversations.
- To enhance user experience and accuracy, later transitioned to **OpenAI Whisper API** for **asynchronous, high-fidelity speech recognition**, significantly improving transcription quality and reliability.
- Built functionality to **capture user audio**, convert it into audio files, and send them to backend services for processing with **Whisper and other AI-driven scoring systems**.
- Enabled **camera and microphone access** to simulate a realistic, one-on-one interview experience, where the bot asked questions sequentially based on the job role, and user responses were captured and evaluated.
- Automated the full interview flow using **Selenium with Python**, testing candidate onboarding, interaction flow, and report delivery end-to-end.
- Tech Stack:** React, TypeScript, Python, Tailwindcss, Rematch, Web Speech API , Selenium

Project : [Lifedemy](#)

- Developed and maintained robust backend APIs for **admin dashboards** to visualize user growth, course engagement, and financial insights.
- Implemented **dynamic filters** for custom date ranges and course categories, enhancing decision-making for admins.
- Utilized **Sequelize ORM** for efficient SQL queries and integrated **pagination, sorting, and caching** to improve performance.
- Tech Stack:** Node.js, Javascript, Express, PostgreSQL, AWS (S3, RDS, EC2, SES, SNS)

Way2agribusiness India Pvt Ltd, Bangalore
Full Stack Developer

February 2023 - June 2023
Bangalore, Karnataka

Project : [Way2AgriTech](#)

- Built backend apis for product inventories, order management, and user management.
- Modernized a legacy PHP e-commerce site by migrating backend to **Django** and **Node.js**.
- Built backend features like **product management, inventory control, and order workflows**.
- Managed **end-to-end deployments** on DigitalOcean with optimized server configurations.
- Improved **SEO** by following **core web vitals** and **web traffic** by developing SEO-friendly **Next.js** applications, leading to better visibility and user engagement.

Certification

-
- [Complete 2023 Web Development Bootcamp](#) – Udemy
 - [Architecting with Google Compute Engine](#) – Coursera
 - [Google Cloud Skill Boost Bootcamp](#) - Google Cloud
 - [UX Design Kickstarter Workshop](#) – Growthschool
 - Complete SQL and Databases Bootcamp - Udemy

Education

Sri Venkateshwara College of Engineering, Bangalore
Bachelor of Engineering, Computer Science and Engineering

2019 - 2023
